

SUMMARY

- Product executive with 20 years of experience leading cloud platforms and AI infrastructure products across Microsoft, Oracle, and Amazon Web Services. Proven track record of incubating new businesses, defining long-term product strategy, building high-performing organizations, driving exponential revenue growth, and delivering platforms used by enterprise developers worldwide.
- **Core competencies:** Cloud Platforms • AI Infrastructure • Containers • Serverless • Functions • Developer Experience • Agent Platforms • Enterprise SaaS • Product Strategy • Organizational Leadership • Go-To Market • Executive Communications

EXPERIENCE

Group Product Manager (Sr. Director), Microsoft

2021-Present

- Lead Product Management for Microsoft Azure App Platform, spanning Azure Container Apps (ACA), Azure Logic Apps, and Azure SRE Agent, managing organizations of 10+ PMs responsible for cloud-native application stack and AI-powered operations platform
- Grew ACA from a pre-GA incubation project into a strategic Azure platform generating \$500M+ annual revenue (40x growth over 3 years) and powering >1M AI-native applications, establishing ACA as Microsoft's flagship serverless application platform
- Incubated and launched multiple strategic innovations, including Serverless GPUs, Sandboxes, and Azure SRE Agent, creating differentiated capabilities for enterprise-grade AI application development and autonomous AI operations platforms
- Expanded Azure App Platform's capabilities beyond compute, leading the development of foundational and horizontal services spanning configuration, observability, AI-powered code optimization, and application delivery, onboarding >100K customers
- Built and scaled multiple high-performing PM organizations, expanding the ACA PM team and founding the SRE Agent PM team to jointly deliver results partnering with a 150+ engineering org as well as field/GTM teams to deliver strategic business outcomes
- Developed future PM leaders by hiring exceptional talent, creating strategic clarity, and establishing a culture of ownership, customer obsession, execution excellence, and coaching PMs to operate with greater ownership and strategic impact
- Defined long-term platform strategy and secured investment for both engineering and product expansion by driving executive alignment across Azure, CoreAI, Data, and partner and field organizations, routinely influencing multi-year investment decisions, product consolidation, platform direction, and GTM / monetization strategy for multiple initiatives

Director of Product Management, Oracle Cloud Infrastructure

2017-2020

- Built and led a 12-person organization spanning Product Management, Program Management and Solution Architecture responsible for Oracle Cloud's developer / devops platform strategy, defining and launching eight new OCI services at KubeCon'18
- Founded OCIs Chief Product Management Office (PMO), standardizing product planning, pricing, and GTM processes across cloud services while reducing executive review iterations more than 5x, accelerating Oracle's cloud platform development and launches

Manager of Product Management, Amazon Web Services

2013-2017

- Led product strategy across AWS Lambda, Amazon EC2 Container Service (ECS), and EC2 Reserved Instances (RIs), helping establish AWS's serverless and container platform strategy and accelerated adoption of AWS cloud platform services
- Built and led PM teams responsible for AWS Lambda roadmap, scaling the business through new features, strategic partnerships, and developer ecosystem initiatives, contributing to AWS's leadership in serverless computing and cloud-native app development

Summer Associate, A.T. Kearney, Inc.

2012

- Defined strategy for optimization of marketing operations and identified bottom-line improvement opportunities for a global packaged food conglomerate by collecting spend breakdown over 200 creative agencies across 8 parameters

Student Consultant, Deutsche Asset Management

2012

- Developed business-cases and GTM plans for 6 product concepts to unlock 10% incremental AUM for Retirement Solutions Group

Marketing Manager, Hewlett-Packard Company

2010-2011

- Identified key customer segments, created value propositions, revamped sales enablement, and drove targeted awareness campaigns for HP Storage Services that helped increase cross-sales by 3% and generate revenue of \$400 million/year

Technical Lead, eInfochips (acquired by Arrow Electronics)

2006-2010

- Led an extended team of 22 embedded systems engineers, delivering complex semiconductor and consumer electronics products while managing customer engagements, technical proposals, cross-functional program execution, and partnership integrations

EDUCATION

University of Michigan, Stephen M. Ross School of Business

2011-2013

- Master of Business Administration, emphasis on Strategy and Finance; graduated with distinction in top 10% of class

Gujarat University

2002-2006

- Bachelor of Engineering, Electronics and Communication; graduated with distinction in top 5% of class (GPA: 3.97 / 4.00)
